

Carb Bloc

Carbohydrates are found in almost any kind of food, even vegetables -- not just bread and pasta. Research has proven that dietary fat is not necessarily converted into body fat. Carbohydrates, on the other hand, are readily converted into fat by the action of insulin. Carb Bloc is made with an extract from white kidney beans, which "neutralizes" the digestive enzyme alpha amylase before it can convert starch into glucose and then fat. Essentially, it allows the carbohydrates to pass through the system possibly with less caloric intake. Paired with a sensible diet and regular exercise, Carb Bloc allows you to safely trim fat without extreme dieting.

Available in 90 capsule bottles.
