

KRE-ALKALYN[®]

Kre-Alkalyn[®] has the benefits of regular Creatine, without the associated side effects some users experience with Creatine Monohydrate. Kre-Alkalyn[®] is Creatine which is 100% stable and will not break down into Creatinine. This allows the Creatine to be absorbed more efficiently into the bloodstream. Kre-Alkalyn[®] allows athletes to use smaller serving sizes while experiencing even more explosive results. Kre-Alkalyn[®] has a pH above 12 because its molecules are synthesized with "buffering" agents using a patented manufacturing process. As a result, it remains completely stable and reaches muscle cells at full strength. Research has shown a dramatic increase in Creatine Phosphate concentration when supplementing with Kre-Alkalyn[®] daily for 2 or more days. Kre-Alkalyn[®] also buffers lactic acid. US Patent 6,399,661.

Available in 30 capsule and 120 capsule bottles.

Kre-Alkalyn[®] is a registered trademark of BioCeutical Research & Development Laboratory (BR&D).
