

When you're ready to succeed, there's an Ultimate Nutrition® product that will work for you.

We Offer Better Options – Lots of Them

In every supplement category, and for every fitness goal, Ultimate Nutrition® makes products that work. From ground-breaking pre-workouts to great-tasting protein powders to amino acids, vitamins, anti-oxidants, thermogenics and more, Ultimate Nutrition® products make your goals easier to reach. Whether you're lifting heavy in the gym, hitting hard on the field, preparing for a triathlon or dropping a weight class, we've got you covered.

The Ultimate Difference is Experience

Ultimate Nutrition® sells more kinds of products in more countries worldwide than any other sports nutrition company. In fact, we offer hundreds of products (many of them in a variety of flavors and sizes) in the USA alone. And we've learned a lot from serving so many different kinds of athletes: how to make supplements with effective formulas, great flavors, convenient sizes and reasonable prices. We can help you, too.

PROTEIN ISOLATE 2

"Alexis from yoga started losing all kinds of weight. She wasn't super heavy, but she started to look really good, how I want to look. She started doing Brazilian Jiu Jitsu at the school next to the studio (yoga). So I checked it out, looked like fun, so I told John (husband) I wanted to try it. He knew what it was, and he wanted go too. He said it was so he could get in shape, but I know why he really came, he's the jealous type. The workouts were more strenuous than my yoga classes; I was always hungry and sore. Alexis told me about this (Protein Isolate 2), and that it was plant-based (we're both vegan). It's helped a lot! I have a shake when I wake up, then right after rolling. I'm starting to see my abs and (laughs) I can choke John out. " **» Lisa, California**

Working It In

Protein Isolate 2 packs the benefits of many animal-based protein supplements but is Vegan-friendly, and derived from only plant-based ingredients. Two different vegetable proteins with different absorption rates make Protein Isolate 2 perfect for any time of the day, or immediately after an intense workout. Just mix one scoop with 12 oz of water or your favorite juice. Each delicious shake will provide you with 20 grams of high-quality plant-based protein to help fuel your muscles.

Keeping It Real

Protein Isolate 2 is made of wheat and pea protein. Wheat protein has a uniquely high glutamic acid content. Glutamine is the ultimate anti-catabolic. This means it reduces the degree of muscle damage and soreness caused by heavy and intense exercise. Glutamine also helps the body produce its own natural growth hormone. This in turn may help promote weight loss, increase lean body mass, and increase bone density. Pea protein contains high levels of arginine and lysine. Arginine helps transport nutrients into muscle cells to promote growth while lysine stimulates fat mobilization for your body to use as energy. To help with digestion, Protein Isolate 2 contains a blend of three non-animal derived enzymes. Each ingredient in Protein Isolate 2 has been carefully chosen to be the highest quality available and Vegan-friendly; all formulated and produced in our own manufacturing facility.

Hard Evidence

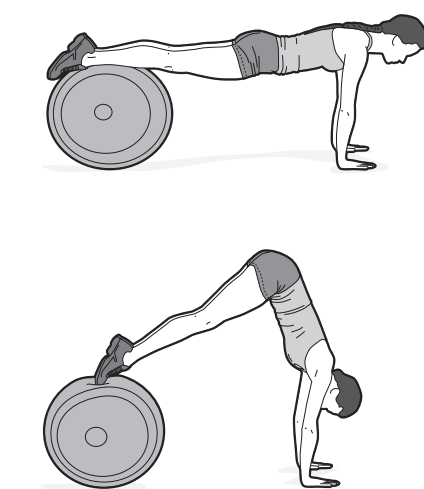

Every scoop of Protein Isolate 2 is loaded with everything you want, and nothing you don't. It has no sugar, no lactose, no cholesterol, and no milk or soy allergens. What it does have is 20 grams of plant-based protein, all the essential amino acids (EAAs) and plenty of naturally-occurring branch chain amino acids (BCAAs). For those sensitive to gluten; Ultimate Nutrition has included an exclusive blend of three digestive enzymes (protease, bromelain, and papain) to break the protein (macromolecular) down into smaller fragments (polypeptides), which are then broken down further for easy digestion.

Throughout the Entire Move

- » Begin in a plank position, hands to the floor, legs together with the ball placed at mid-shin
- » Maintain a neutral spine keeping legs straight, toes pointed away
- » Press your legs and feet into the ball while using your abs to raise your hips
- » Hinge at the hips and shoulders
- » Once you're on the tips of your toes in a "V" position, hold briefly
- » Slowly lower back to the starting position, and repeat
- » Avoid bending your elbows or knees, or rounding your back

Do it Like the Pros

- » Swissball Pike

Available in 30-serving bottles in two great flavors: Chocolate Vanilla

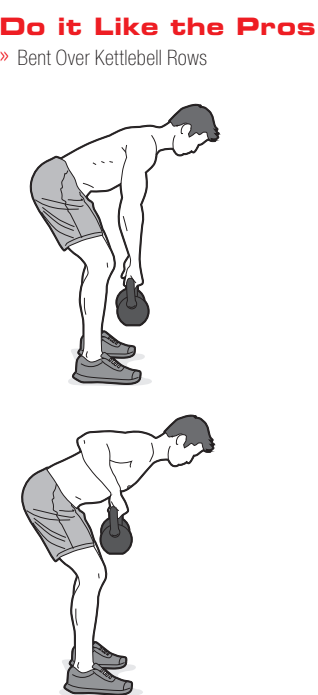

At the Top

- » Kettlebells are between your feet
- » Feet shoulder width apart
- » Knees bent slightly, hips back
- » Arms fully extended

At the Bottom

- » Pull kettlebells to your stomach
- » Keep elbows tucked in at your side, retracting shoulders
- » Elbows should go beyond your back
- » No movement of back or hips during row
- » Spine is neutral

Do it Like the Pros

- » Bent Over Kettlebell Rows

BCAA

"I love swimming, biking, running; love the outdoors. So I got interested in triathlons and eventually joined a training club. At the first group training, I couldn't believe how some of these guys, and women, just kept going and going at that pace. I thought I was in pretty good shape, but 'damn.' I didn't want to get discouraged, so I asked around, you know, 'what's going to help me?' And when we got back, one of the older guys showed me a bottle of this (Orange Flavored BCAA 12,000 Powder). I always thought amino acids, and especially BCAAs, were only made for bodybuilders. I didn't realize they could make a huge difference in endurance competition. Long story short, now I'm leading the (training club) pack instead of hanging at the back. And the Orange is great, but Blue Raspberry is my favorite." **» Derrick, New Jersey**

Working It In

Flavored BCAA 12,000 is the ideal addition to any athlete's dietary routine. It can be taken before, during, and/or after your most intense workouts. Its unbelievably good taste makes it the perfect mix-in with your favorite protein shake, juice, or even just water. Just one 7.6 gram scoop mixed with water or your favorite cold beverage delivers the branched chain amino acids your muscles crave and need.

Keeping It Real

Like all of Ultimate Nutrition's powerful supplements, Flavored BCAA 12,000 is formulated to the absolute strictest standards in our own manufacturing facility. With every scoop, you get the purity of 100% Crystalline BCAAs made to the finest USP quality standards. Available in 8 great-tasting flavors, and unflavored.

Hard Evidence

The science is in: L-Leucine, L-Valine and L-Isoleucine (the Branch Chain Amino Acids in Flavored BCAA 12,000) have been proven to enhance athletic performance. They do this by helping to reduce protein breakdown, increase protein synthesis, and stimulate the release of insulin. That means that after a long, intense ride, swim, or resistance training session, your body's not breaking down muscle. It's building it! Each serving provides the perfect 2:1:1 ratio of L-Leucine (3000mg), L-Valine (1500mg) and L-Isoleucine (1500mg). The most intense bodybuilders or distance athletes should go with two scoops to unleash the full potential of Flavored BCAA 12,000!

Available in 1lb, 2lb, 5.28lb and 10lb Sizes, in 10 flavors: Chocolate Crème, Vanilla Crème, Strawberry, Banana, Natural, Cocoa Mocha, Chocolate Mint, Rum Raisin, Raspberry, Cookies n' Cream

PROSTAR 100% WHEY

"Everything started fitting a little better when I got in to cross training. But then, after maybe six months I hit a 'plateau.' That's when I started to pay more attention to diet, and I tried a bunch of whey powders. Most of them are pretty nasty, but Prostar actually tastes good. I just add it to the rest of my water at the end (of a workout), shake it up and drink it down. It really is kind of like a chocolate milk shake. Anyway, got that started a couple months ago, and I'm definitely stronger. I get through workouts faster with heavier weights; going shopping for some new gym clothes, cause I dropped another size. Y'all should try it (Prostar Whey). Worked for me." **» Aimee, Texas**

Working It In

Prostar 100% Whey Protein is the most versatile protein supplement on the market. It can be taken any time of day—even up to three times per day. One 30 gram scoop can be added to 8 oz of water, juice, milk, or anything. It's instantized, so it mixes easily with just a spoon. Start the day off with a quick shake, and then another an hour or so before training, then another immediately after. You can even add Prostar 100% Whey to your favorite recipes. Sunday morning muscle pancakes sound pretty good.

Keeping It Real

There are a lot of choices out there when it comes to whey protein. That's why it's important to know that Prostar 100% Whey is simply the best. It's customized whey that is isolated by a complex low-temperature processing system that utilizes a proprietary micro- and ultra-filtration process to ensure the highest-quality whey protein. Prostar 100% Whey contains all the whey protein fractions and is made to the absolute strictest manufacturing standards in our own cGMP certified manufacturing facility.

Hard Evidence

Each 30 gram scoop of Prostar 100% Whey Protein is loaded with 25 grams pure protein! It's a blend of whey protein isolate, whey protein concentrate and whey peptides. Protein is essential in repairing and building muscle so it helps you achieve all your fitness goals. Studies have shown that ingredients in Prostar 100% Whey Protein can help boost your body's own antioxidants which may help boost immunity while also raising your body's level of Insulin Growth Factor-1 (IGF-1).

At the Top

- » Hold arms stretched out in front of you
- » Lift one foot off the ground with your leg straight

At the Bottom

- » Squat down on one leg keeping other leg stretched out straight
- » Use arms for balance through movement
- » Allow knee to push past your foot on the way down
- » Once at the bottom hold for a moment then push through your heels to come back up
- » Keep spine neutral through the movement

(If you find difficult at first start using a low chair beneath you, beginning from the seated position.)

Do it Like the Pros

- » Pistol Squat

Available in 1lb, 2lb, 5.28lb and 10lb Sizes, in 10 flavors: Chocolate Crème, Vanilla Crème, Strawberry, Banana, Natural, Cocoa Mocha, Chocolate Mint, Rum Raisin, Raspberry, Cookies n' Cream

PROSTAR 100% CASEIN

"I tried out as a 'walk-on,' with no idea if I was going to make the team, so I was stoked when I got the call. Biggest thing I remember was seeing how jacked some of these dudes were at the tryout. Our school's weight room is almost always open, so I've been putting in about an hour each night after practice. I asked our strength coach what I should take to get the most out of my weight training. He went to the supplement shelf in the office and gave me this (Prostar 100% Casein). He told me I could take it anytime but before bed was best. Now I sleep better, and it's hard to explain, but I feel more 'recovered' in the morning. Not sure if that makes sense, but it's legit. In my head, I play this game where the Prostar (Prostar 100% Casein) is my reward when I finish working out, because it tastes so good." **» Juan, Idaho**

Working It In

The Deluxe Casein Blend in Prostar 100% Casein is comprised of Hydrolyzed (2-4 hour digestion time) and Micellar (4-8 hour digestion time) Casein, which are the most useful forms of Casein protein. This means that Prostar 100% Casein is a slow-digesting protein that feeds your muscles for up to 8 hours. That makes it an ideal way to replenish your muscles and brain with the important protein they crave. Just two scoops mixed with 8 oz of milk or water 30 minutes before bedtime gives your body everything it needs to recover from the hardest workouts. For the absolute best results, stack Prostar 100% Whey (before and after workouts) with Prostar 100% Casein (at night).

Keeping It Real

When it comes to casein protein, there are two major distinctions; micellar caseinate and calcium caseinate. Calcium caseinate is lower quality and typically used as a food ingredient. That's why you'll only find the highest quality micellar caseins in Prostar 100% Casein. Like all of our world-class supplements, Prostar 100% Casein is manufactured to the strictest standards anywhere, in our own facility.

Hard Evidence

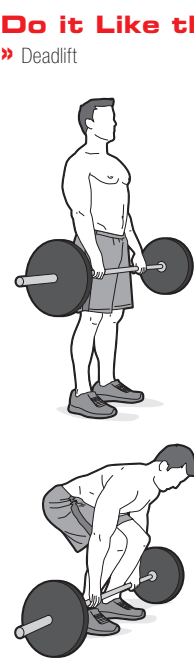

Prostar 100% Casein features a superior naturally-occurring amino acid profile. Every serving of Prostar 100% Casein contains all the Essential Amino Acids (EAAs) and the Branch Chain Amino Acids (BCAAs); L-Leucine, L-Valine and L-Isoleucine. This complete profile makes it the perfect supplement for high-performance athletes looking to build muscle mass. Each serving delivers 24 grams of pure casein protein, not to mention 24,000 mg of naturally occurring Amino Acids!

At the Top

- » Stand with bar over the middle length of your foot
- » Toes pointed out slightly hip width
- » Bend at the knees, hinge at the waist
- » Grab the bar just outside your legs
- » Lift chest, hold breath, stand up, maintain neutral spine through move

At the Bottom

- » Lock out hips and knees at the top of each rep
- » Elbows locked through entire move, never bent
- » Do not shrug weight, shoulders and traps are relaxed
- » Back is neutral with a slight natural arch
- » To return, hips back first bending knees once bar reaches them

Do it Like the Pros

- » Deadlift

Available in 2lb and 5lb Sizes, in 3 flavors: Chocolate Crème, Vanilla Crème, Strawberry

CARNEBOLIC

"I started in high school, so it's been a long road. Most of the thighs, delts and shoulders is pretty recent, and it's gotta be diet. (I've) got milk allergies; can't really digest whey. Then, maybe two years ago, this (CarneBolic) stuff came along and it feels like it was just made for me. Seriously. Over the last year, I've put on close to 20 pounds, and it's still coming. Great product. Love the Orange one." » Jason, Iowa

Working It In

Adding CarneBOLIC to your workout regimen is simple. Depending on your specific goals and protein requirements, between 1 and 4 servings can be enjoyed daily (before and/or after intense training sessions), first thing in the morning, just before you go to bed, and/or anytime in between. Because it's 100% pure beef protein isolate, you don't have to worry about bloating or many of the other negative side effects often linked to other milk-based proteins.

Keeping It Real

CarneBOLIC is formulated to the absolute strictest standards in Ultimate Nutrition's own manufacturing facility. You get over 3½ times as much protein as raw red meat with none of the fat or cholesterol you'd find in a steak.

Hard Evidence

Let's look at the numbers: each serving of CarneBOLIC contains zero carbs, zero fat, is free of soy, milk, egg, lactose, and gluten—none of the stuff you don't want. What it does have is 24 grams of 100% pure beef protein isolate. Like all of Ultimate Nutrition's drinkable products, no matter which of the six different flavors you choose, the taste is amazing!

MUSCLE JUICE® 2600 REVOLUTION

"When I started taking it (bodybuilding) seriously, I didn't realize how much reading I'd have to do. Then I saw this thread about Muscle Juice Revolution. The guy who posted actually was a bio chem student, I think. He was saying that it (Muscle Juice Revolution) had an exclusive protein blend (Octo-PRO™) with eight kinds of protein. Anyway, I did some research on my own and turns out this stuff is the bomb. It has a ton of Glutamine (L-Glutamine and L-Alanyl-L-Glutamine) so I can hit it hard and not be as sore the next day. Which flavor? Definitely the Cookies 'n' Cream." » Lou, Nevada

Working It In

When taken with an intense training schedule, be ready to pack on some serious muscle. On training days, go with two servings, one in the morning then another right after your workout. On rest days go with a serving between your morning meals then another between meals in the afternoon. Thanks to the Octo-PRO™ protein formula, it's time-released, so Muscle Juice Revolution is perfect right before you go to bed too. Each serving is 4 scoops. Mix with water or milk.

Keeping It Real

One of the unique features of Muscle Juice Revolution is the proprietary Octo-PRO™ Protein Blend. It's made up of eight unique proteins (whey protein concentrate, whey protein isolate, milk protein isolate, hydrolyzed whey protein, egg protein isolate, micellar casein, milk protein concentrate, calcium caseinate) that give your muscles the most complete protein blend around. Muscle Juice Revolution is also made with Karbo-lyn®. This is designed to quickly load your muscles with accessible muscle glycogen. Of course, like all Ultimate Nutrition products, Muscle Juice Revolution is made to the strictest standards with absolute best ingredients in our own manufacturing facility.

Hard Evidence

Each serving of Muscle Juice Revolution packs 56 grams of Octo-PRO™ Protein blend and 170 grams of time-release carbohydrates to aid in digestion and minimize bloating. For recovery and reduced soreness, it's also packed with 1000mg of L-Glutamine and L-Alanyl-L-Glutamine. To help with absorption and assimilation, an Enzyme Blend is also included. No other weight gainer on the market is so customized for the unique demands of the competitive bodybuilder or strength athlete. Each flavor is delicious and makes every day feel like a cheat day!

ISO MASS XTREME GAINER

"When I started training really heavy, the hardest thing was keeping up with all the different supplements. I already working 70 hours a week on top of training and I was like 'are you kidding?' Take this when you wake up, take that before you do whatever, blah, blah, blah.' Maybe if I didn't have to work, I could do all that stuff. I wanted to find the supplement that had 'EVERYTHING' in it. Get me that, let me take it whenever I want. Then my buddy Jim gave me the IsoMass (IsoMass Xtreme Gainer). I looked at the label and was like "damn," it had everything I was reading about. I've been taking it (Chocolate Milk) for 2 months now, 3 times a day; I love it. It's real easy and I'm getting everything I need. I'm doing my first strong man in two weeks. I'm going to crush it!" » Andrew, Ohio

Working It In

IsoMass Xtreme Gainer is the most complete supplement on the market today. Take it up to three times daily with either water or milk. It's perfect for after training, between meals or the end of the day. It features seven different proteins, five types of carbohydrates, seven different creatine compounds, omegas, glutamine, arginine, beta alanine, enzymes and so much more. Three scoops mixed with 18 oz of water or milk covers all the bases. Perfect for your busy schedule.

Keeping It Real

There's more science behind IsoMass Xtreme Gainer than you could possibly imagine. Never before has so much research and testing gone into this type of product. You'll see it in the ratio of carbohydrates to protein, the specific types of proteins (7 total), the exact types of carbohydrates (3 total), creatine for muscle growth, glutamine for recovery, a complete vitamin premix and blend of healthy fatty acids. There's also a blend of nitric oxide precursors for enhanced vasodilation, along with an enzyme complex to increase absorption and uptake. You get all that and the peace of mind that it's made to exact standards in Ultimate Nutrition's own manufacturing facility.

Hard Evidence

Not too often do all your wants and needs combine into one convenient product, but this is it! Each 153 gram serving contains 65 grams of protein, 80 grams of carbohydrates, 7 grams of seven types of creatine including Kre-Alkalyn®, 6.5 grams of healthy fatty acids including Omega 3 fish oil and flax seed oil, 3.2 grams of vitamins and minerals, including chromium, potassium iodide, and zinc oxide, 2.2 grams of four different types of glutamine, plus Arginine, Beta-Alanine, BCAAs (Branch Chain Amino Acids), EAAs (Essential Amino Acids) and so much more!

Any Body, Any Sport, Any Goal.

Through the Entire Move

» Forward-looking with chin raised slightly

» Hands close to shoulders with elbows pointing downward

» Feet slightly wider than shoulder width

» Core muscles are tight

» Neutral spine, lower back slightly arched

» Keep weight over the heels

At the Top

» Push through with the weight loaded through the hips down to the heels.

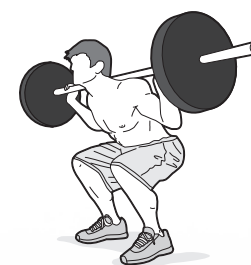

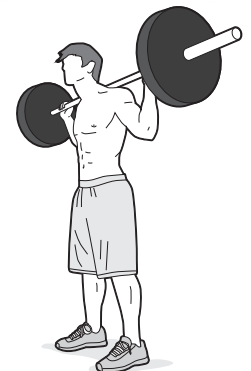

At the Bottom

» Descend until knees are bent at a 90° angle

» Push knees outward on the way down

» Don't allow knees to go past toes

» Glutes should be pushed back

Available in either 30- or 60-serving containers in six fantastic flavors:

Fruit Punch
Blue Raspberry
Lemonade
Orange
Chocolate
Vanilla

At the Top

» Hands on the bar slightly wider than shoulder width

» Feet flat on the ground

» Lower back rounded slightly

» Arms locked at the top of each rep

At the Bottom

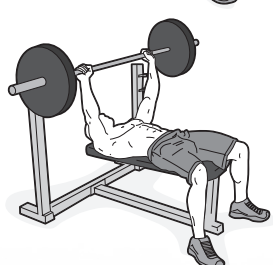

» Raise and lower bar slowly with control

» Forearms are perpendicular to the floor at the bottom of each rep

» Chest lifted, lower back arched

» Bar touches chest lightly at the bottom of each rep

» Keep elbow pointed outward

Available in 4.69lb and 11.1lb containers in five delicious flavors:

Chocolate Crème
Vanilla Crème
Strawberry
Banana
Cookies 'n' Cream

Throughout the Entire Move

» Lift with your legs if performing deadlift or squat

» Keep your spine erect

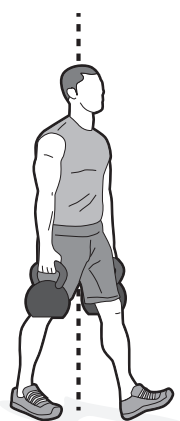

» Squeeze glutes and tuck ribcage to maintain posture

» Take short steps, keep weight centered, don't swing

» Increase weight and distance gradually
