

AMINO 2000

Amino 2000 contains all of the most important amino acids for optimal nutritional support. Each tablet contains 2000mg of enzymatically digested whey protein isolate. Enzymatically digested whey protein isolate increases the protein digestibility and improves amino acid absorption for greater assimilation by your body. These amino acids provide the body with the support to produce proteins, and ensures that cells, tissues and organs in the body have a ready supply of amino acids, which helps foster better health. Amino 2000 is a full-spectrum nutritional aid to help maintain optimal levels of amino acids in the bloodstream and promote good health at any stage of life.

Available in 150, 330 tablet bottles.
