

PREMIUM EGG PROTEIN

Egg protein has the longest history of use among weightlifters and bodybuilders due to its high ratio of absorption and its time-proven results. Egg white protein is lactose-, fat-, and cholesterol-free and is a rich source of protein, containing the essential amino acids the body requires. It also contains high levels of sulfur, EAA's, BCAA's, vitamins and electrolytes that athletes need. Egg protein is also easily digested thereby enhancing the bioavailability of the protein making amino acids available for new protein synthesis and replacement of lost protein. Ultimate Nutrition's Premium Egg Protein is an easy way to take in all the egg protein an athlete wants in one delicious and nutritious shake.

Available in Chocolate and Vanilla flavors, 2.2lb containers.
