

ISOPREME BIOACTIVE WHEY PROTEIN ISOLATE

Protein has a number of different roles in the body including repairing body cells, building and repairing muscles and bones, providing a source of energy, and controlling many of the important processes in the body related to metabolism. Whey protein is a high quality, complete protein, with all the essential amino acids. Whey protein is also the richest known source of naturally occurring branched chain amino acids (leucine, isoleucine and valine). These are important for active individuals, individuals who exercise and professional athletes. The body requires higher amounts of branched chain amino acids during and following exercise as they are taken up directly by the skeletal muscles versus first being metabolized through the liver, like other amino acids.

Ultimate Nutrition's Isopreme Bioactive Whey Isolate is produced exclusively through a new and innovative technology, ColdPure ultrafiltration. ColdPure ultrafiltration isolates the native whey protein in a highly bioactive form using an advanced low temperature ultrafiltration process. ColdPure ultrafiltration produces a superior Bioactive whey that is non-denatured and contains the highest content of essential amino acids (EAA's) and branched chain amino acids (BCAA's).

Available in Vanilla, Chocolate, Strawberry and Strawberry Banana, 1 lb, 2lb, and 5lb containers.
