

Ultimate Nutrition Hydrocool

Product Description

Throughout a grueling training session, your muscles are filling with lactic acid and starting to cramp. Your body is dehydrated and is drifting into a catabolic state as it has been depleted of nutrients, BCAAs, and protein. Ultimate Nutrition's team of researchers have dedicated countless hours to developing a formula to specifically address your body's needs. Every scoop of HydroCool™ provides 33 grams of premium-quality hydrolyzed whey protein isolate, over 15 grams of naturally-occurring essential amino acids (EAA) and over 7.5 grams of naturally-occurring branched chain amino acids (BCAA).

HydroCool™ is a fast-acting, ultra-pure hydrolyzed whey protein isolate (HWPI) blend of multiple degrees of hydrolysis. The process of hydrolysis has been shown to be approximately 30% more effective in stimulating skeletal muscle protein synthesis than the intact milk substrate when measured over a six hour period¹. Muscle protein synthesis (MPS) is the driving force behind adaptive responses to exercise. Recent studies have shown that nutrient-driven increases in MPS have a short window (~1.5 hours)², which is why Ultimate Nutrition recommends that HydroCool™ be taken immediately after training.

HydroCool™ includes a mixture of enzymes designed to enhance the protein utilization process. These enzymes mirror those found in the human digestive tract. This allows the enzymes to further breakdown the whey protein isolate into peptides, which can be easily and quickly absorbed into muscle tissue to repair and strengthen your body.

But what good is a scientifically backed formula if it tastes so bad you can't drink it? Ever had a competitor product that says vanilla on the bottle, yet tastes like cement? Clumpy protein pockets in your shake? Ultimate Nutrition has heard your cries for help. HydroCool™ was formulated with those concerns in mind and ensured to create a product that mixes with ease and comes in delicious flavors such as Chocolate, Vanilla, Strawberry, and Cookies n' Cream.

Ultimate Nutrition's Pro Series is fueled by science and designed for the driven athlete. HydroCool™ is the whey of the future. Grab a bottle of your own today!
