

Ultimate Nutrition Natural Gainz

Ultimate Nutrition's Natural Gainz is a cutting-edge formula that packs 1290 calories from a combination of key nutrients. Each six-scoop serving is packed with 60g of protein from multiple sources, 13g of healthy fats, 240g of high-quality carbohydrates, and 6g of dietary fiber.

The 60 grams of protein in ***Natural Gainz*** consists of whey protein isolate, milk protein isolate, hydrolyzed whey protein, micellar casein and whey protein concentrates. These proteins and their varying absorptions rates deliver an array of potent muscle-building amino acids, helping the body maintain positive nitrogen retention for extended periods of time.

Oat fiber's inclusion in ***Natural Gainz*** aids digestion of the various protein sources. Oats are rich in dietary fiber and, most importantly, a specific type of fiber called beta-glucan, which is known to help lower levels of bad cholesterol.¹ The formulation also includes antioxidant-rich avocado oil, the main source of healthy fats in ***Ultimate Nutrition's Natural Gainz***. According to clinical research, avocado oil has also been shown to help maintain healthy cholesterol levels, by increasing HDL, the "good" cholesterol.^{2,3} Avocado oil is also a good source of lutein, a nutrient that can improve eye health.

Ultimate Nutrition's Natural Gainz can be dosed according to your daily needs. A two-scoop serving acts as a protein shake, providing 430 calories containing 20g of high-quality protein. Four-scoops serve as a meal replacement drink, boasting 860 calories and 40g of protein. The six-scoop serving offers 1290 calories (1320 for Chocolate) and 60g of protein, perfect for mass gaining. It also comes in a wide variety of flavors, including Vanilla, Peanut Butter & Jelly, Strawberry, Chocolate, and Cookies & Cream.
