

Ultimate Nutrition, Gold Series Fat Burner

Today's athlete is leaner, quicker, and faster. With the modern athlete in mind, Ultimate Nutrition's team of scientists has engineered the next great fat burner: **Gold Burn**. This innovative botanical approach to burning fat will have your body **beach-ready all year round**.

Eat, train, sleep, repeat. Eating right is fundamental for making clean gains, but everyone falls off the wagon once in a while. **Gold Burn** is the perfect complement to your dietary regimen. **Synephrine**, the active compound in **Citrus Aurantium**, has been shown to **increase resting metabolic rate** by ~217%, while also increasing energy expenditure.¹ Synephrine works synergistically with **Caffeine** to achieve an additional 4% increase in calories burned.⁴

Burning calories is half the battle, but burning fat is how to win the war! Clinical studies have shown that **Cayenne Pepper Powder** can increase **fat oxidation rate (fat burning)** by ~42%.² Working in conjunction with Cayenne Pepper Powder, the scientifically-researched **Green Tea Extract** has been shown to **increase fat burning** by an additional 10%!⁴

There are miracle pills that promise fat loss in 10, 20, or 30 days, but with **Gold Burn** idle promises aren't being made, scientific fact is being delivered. A key ingredient, **Phaseolus vulgaris** (White Kidney Bean), has been shown in studies to help participants lose 10.4% fat mass in 30 days.³ Any company can make veiled promises, but Ultimate Nutrition's researchers are delivering scientifically-backed ingredients for results that speak for themselves.

Ultimate Nutrition's **Gold Burn** has been formulated to get you ready for the stage or the gold, sandy beaches. Take your body to the next level today!
