

F-16

Serving Size: 1 serving = 2 scoops (56g)

20 servings

Amount per serving:

		%DV
Calories	140	
Total Carbohydrate	36g	12%
Sugars	34g	
Phosphorus	402mg	40%
(from potassium phosphate, disodium phosphate, magnesium phosphate)		
Magnesium	108mg	27%
(from magnesium phosphate)		
Sodium	260mg	11%
(from disodium phosphate)		
Potassium	290mg	8%
(from potassium phosphate)		
Creatine Monohydrate	10.5g	
B-Power	3.3g	
(Carnosine, Beta-Alanine, Histidine)		
V-Power	6.5g	
(Inositol Hexaphosphate (IP-6), Taurine)		

Other Ingredients: Dextrose, Natural and Artificial Flavors, Citric Acid, Sucralose, and Beet Root Powder (for color).

Suggested Use:

1. One serving = two scoops.
2. For the first five days (loading stage); take two servings daily, one serving in the morning and another serving 12 hours later, or right after you work out.
3. For the next ten days (maintenance stage); take one serving immediately after you work out. On non-workout days, take one serving in the late afternoon.
4. For best taste, mix each scoop of F-16 with 6 oz. of water. Add more water if the taste is too strong. F-16 may be stacked with Ultimate Nutrition's ArgiNOne.
