

Ultimate Nutrition, NutriMeal Scientific Description

Ultimate Nutrition's NutriMeal contains Whey Protein Concentrate, which has numerous benefits including anti-microbial and anti-virus properties, immune-boosting elements, bone-health support, improvement of antioxidant capability, and improvement of physical activity¹. Whey Proteins are a rich source of branched chain amino acids (BCAAs) which are used as fuel and directly broken down by your muscle tissue. During activity muscle breaks down, this is why they are so important in your every-day diet¹. Bovine Colostrum, a source of protein, carbohydrates, fats, and antibodies, which in recent studies has demonstrated stimulation of cellular growth and DNA synthesis also aids in enhancing lean muscle tissue.²

NutriMeal comes complete with 28 essential vitamins and minerals, 7 grams of fiber and only 5 grams of sugar. Each serving of **NutriMeal** delivers over 300 calories (320 for chocolate, 310 for Vanilla) with 16 grams of protein, 57 grams of total carbohydrates and 5 grams of fat, providing the benefits of a balanced meal in the convenience of a shake.
