Energy Smash

Do you need an energy boost? Energy is sometimes hard to find when trying to keep up with a fast paced and demanding life. The lack of energy and alertness can be frustrating. There can be many reasons for not having energy; poor diet, mental or physical stress and/or fatigue. This is where Energy Smash comes in handy. Energy Smash is a new high performance drink designed to increase energy for both your body and mind.

Energy Smash by Ultimate Nutrition is a potent blend of natural herbs, vitamins, and caffeine that supply a burst of energy whenever you need it most. It is designed to complement the lifestyle of today's active man or women. Energy Smash is the perfect "pick me up" for people experiencing lack of energy.

- Fight exhaustion
- Eliminate physical and mental fatigue
- Enhance mental alertness
- Energize your workouts

When working out intensely, water is a great hydrator, but cannot replace the nutrients and energy that your body has lost during the process. But then, athletes are not the only ones that can take advantage of the benefits of Energy Smash. More and more people are turning to energy drinks for that much needed supply of energy that cannot be found in other beverages.

Energy Smash utilizes an energy packed Proprietary Blend, which contains essential herbs to fight physical and mental fatigue and enhance alertness. Included ingredients such as Ginseng and B vitamins can give you more mental alertness, a better feeling of well-being, and greater energy. B vitamins are essential for converting fats, carbohydrates, and proteins into energy. B vitamins are co-factors in the creation of your body's ATP, or energy molecules.

Ginseng comes from a group of adaptogenic herbs from the Araliaceae plant family. It has been used as a tonic that induces well-being and balance in the body, having an effect on metabolism, motivation, and performance. Ginseng is a natural stimulant that can counter fatigue, improve cognitive function, and enhance athletic ability.

Taurine has been shown to improve mental alertness, increase reaction speed, and magnify concentration ability. This ingredient helps with alertness, concentration and coping with pressure. When consumed moderately, caffeine improves voluntary movements, contributes to mental quickness and shortens reaction-time.

Energy Smash was specially formulated to help combat fatigue, providing you with the energy to get the most out of life.

FREQUENTLY ASKED QUESTIONS:

When is the best time to drink an energy drink?

If using an energy drink to aid your workout, the best time to drink an energy drink is when you are just starting or in the mid-part of your workout. By the time you lose some of your energy, the supplied energy from the drink will already be in the process of taking its place.

Can I take Energy Smash with other caffeine containing products?

Energy Smash contains 50mg of caffeine per serving and 150mg per can. It is suggested you limit the use of other caffeine containing products. Too much caffeine may cause nervousness, irritability, sleeplessness, and, occasionally, rapid heartbeat.
