THE ULTIMATE STANDARD

Ultimate Nutrition® Flavored BCAA 12,000 Powder contains 6 grams of branched chain amino acids (BCAAs). Each serving uses the optimal 2:1:1 ratio of Leucine, Isoleucine, and Valine. Whether it is taken on its own or combined with your favorite workout drink, Flavored BCAA 12,000 Powder mixes instantly and tastes amazing.

WHY YOU WANT BCAAs

(Leucine, Isoleucine, and Valine)

The BCAAs Leucine, Isoleucine, and Valine comprise 35-40% of the essential amino acids in the body and are required for maintenance of muscle during physical stress and exercise. Drinking BCAAs helps to promote protein synthesis and spare muscle breakdown during intense training sessions.

DIRECTIONS

Mix one rounded scoop (about 8 grams) with 6-8 fl. oz. (about 180-240ml) of water (adjust for desired taste). For optimal use on training days, take one rounded scoop during your workout and one rounded scoop after your workout. On non-training days, take two rounded scoops between meals.

WHEN TO FUEL UP FOR MAXIMUM RECOVERY

DURING WORKOUT

POST WORKOUT
