

Using Ultimate Nutrition's Brandmark

Original Art

Ultimate Nutrition logo (the Logo) original drawing files are EPS (vector) format, which remains clear at any size. It is the user's responsibility to convert EPS files to any other required file types at adequate resolution, so that the Logo remains perfectly clear, and never looks out-of-focus, jagged or fuzzy.

Don't Change It!

Our Logo is a registered trademark. It must appear exactly as drawn, including the registration mark,®. It must not be altered or distorted in any way.

Minimum Size

Although there is no maximum size limit, the Logo must not be reduced to less than 22mm, or 7/8" wide.

Colors

The Logo is only used in three colors: white, black and PMS2735 (or exact match). PMS2735 is dark violet and is used on a white background only. Black Logo may be used on any color background lighter than 40% black density. Only a white Logo may appear on higher-density (darker than 40%) backgrounds.

Clear Space / Shared Space

The Logo must have adequate clear space around it. The minimum amount of clear space required is equal to the height of the Logo small caps combined. The Logo may not share undefined or empty space with any other symbol, logotype, device or brand, regardless of clear space.

Background Contrast / Noise

The Logo must only appear on a solid or near-solid color background. Any background texture must be kept to minimum contrast. Placement on images with contrast patterns or color variations is prohibited.

Type Specification

Recommended typefaces to use with the Logo are those used in this document: Barlow is preferred for all written communications, and Stratum1 may be used, as necessary for display callouts and headline emphasis. Barlow is an extended family with many weights and widths, and should be used for most purposes. Both are Google fonts. Alternatively, set in an evenly weighted sans-serif such as DIN.

Questions?

Advice about Ultimate Nutrition branding, logo usage and access to support materials is available at distributors.ultimatenutrition.com or contact James Grendzinski, Art Director jgrendzinski@ultimatenutrition.com

Background Contrast Requirement

White Logo on dark backgrounds:
100% - 40% density

= density 40% K

Black Logo on light backgrounds:
0% - 40% density

PMS2735

Color Matches:

100C|90M|0Y|20K

RGB: 39/0/137

HEX: 270089

(White Logo only)

PMS2735 Logo may only be used on a white background

Clear Space Requirement
= X minimum
